

APPLICATION

GLASS STAIRS

A [Glass Staircase](#) creates a new, bright and original space.

By using materials from the latest technologies, Righetti wants to respect perfectly all architectural requirements and security standards.

Whether you want a straight, a half or a spiral staircase, all our Glass Stairs are custom-made.

Righetti designs glass stairs made of triple tempered laminated glass to guarantee a high resistance against major impacts and to support heavy loads.

It is possible to customize the glass steps of a staircase by incorporating decorative materials: images, colours, gradients, graphic elements, LED lighting, etc.

TECHNICAL INFORMATION

- All our achievements are calculated on the basis of the CSTB 3448 specifications, which is the only recognized standard in this field.
- Triple tempered laminated glass
- Our glass stairs are made of clear, extra-clear, transparent or opal glass
- Straight or shaped steps (numerically-controlled machines)
- Glass rebated on all 4 sides or as a punctual support
- Possibility of incorporating stainless steel inserts in stairs
- Reduced slip treatment possible (also called anti-slip treatment)
