

DECORATIVE LAMINATED GLASSES

INOVA® SWITCHABLE GLASS

The INOVA® Switchable Glass is an EVA laminated glass manufactured by assembling 2 glass plates with a liquid crystal polyester film in-between.

The glazing changes from opacity to transparency thanks to an electric current.

When the power is turned off, the glass gets its opaque appearance back.

TECHNICAL FEATURES

- Max. dimensions : 3500 x 1800 mm
- Supplied with transformer
- Optional remote control
- European quality
- Short lead time: 3-4 weeks
